

WOMM

Workshop on Ordinary and Multilevel
Modeling

At 2009 CUNY Conference on Sentence
Processing, UC Davis

*Harald Baayen, Dale Barr, Austin Frank,
Florian Jaeger, Victor Kuperman, Roger Levy,
Fermin Moscoso del Prado Martin*

Goals for today

- *Conceptual background for multilevel models*
Roger Levy and Fermin Moscoso del Prado Martin
- *Fitting, evaluating, and interpreting models*
Florian Jaeger and Victor Kuperman
- *Advanced issues in multilevel models*
Harald Baayen
- *Analysis of time-series data*
Dale Barr and Austin Frank

Plus audience members!

Today we R

- It happens to be the case that today's presentation all make reference to R and provide R code
- ... but the conceptual points (the majority) we make are independent of the software package.

Video taping

- **This session will be video-taped and later be made available via the WOMM webpage (if it turns out to be useful).**

You

- Meant to be a Q&A workshop, so it's ok to interrupt but a couple of considerations:
 - Minimal background in regression is assumed
 - We have a lot to cover
 - Things may be addressed later ...
- Yet, before we completely lose you or are too redundant, please let us know

Please

- ... keep track of remaining questions.
 - Things that weren't clear
 - Additional topics to be covered in future workshops
- Stay in the loop: subscribe to RSS feed of WOMM website and to:
<http://groups.google.com/group/womm-cuny2009/>
